Video Recording

Key Points

- Submit via Panopto:
 - <https://video.nottingham.edu.cn/Panopto/Pages/Sessions/List.aspx#folderID=%22914d59f3-6477-4e23-99e3-b3160066f1f0%22>
- Backup Submission (via MS Forms):
 - <https://forms.office.com/r/MzWJWBFT8N>
- Late Submission Penalty: 5% **per hour** (Non-standard penalty)
- File Format - MP4
- Your video must be named after your student id (numbers only)
 - e.g. 2021XXXX.mp4

Submission

Note

The Folder names used in these instructions may vary from year-to-year.

For your **Panopto submission**, you should navigate to the submission folder (link above). Follow the instructions provided below to upload your recording.

Step-by-Step Instructions

1. Navigate to the Panopto Assignment folder

📁 FYP 2020-21 Presentation

☰

Filter by date

Sort by: Name Duration Date ▼ Rating

📁 FYP 2020-21 Presentatio...

2. Navigate to the assignment folder:

📁 FYP 2020-21 Presentation [assignments]

↑

🔄 Refresh

🗪

📄

☰

Filter by date

Sort by: Name Duration Date ▼ Rating

This folder contains no videos.

3. Click the "Create" button and select "Upload media" from the resulting drop-down menu:

Create ▼

📹

Record a new session
Record from your Mac or Windows PC

☁️↑

Upload media
Create new sessions by uploading video or audio

📺

Webcast
Prepare a webcast and share a link to it

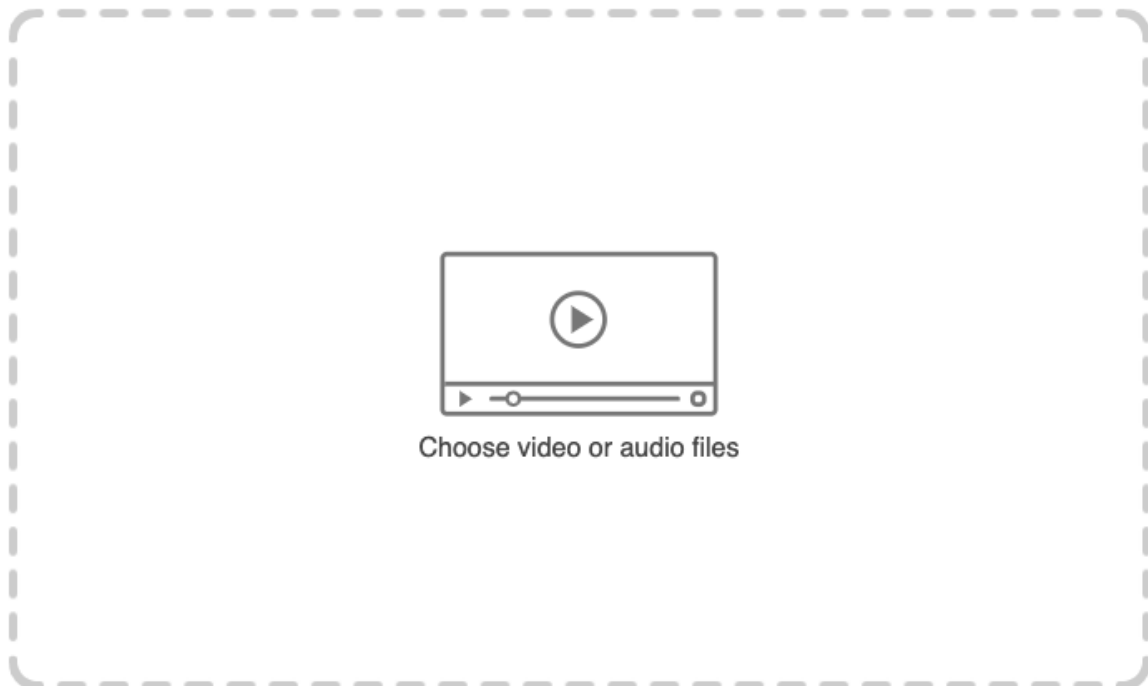

📄

Build a session
Combine your slides, video, and audio

4. Drag your demonstration recording into the dotted rounded rectangular area. Wait for the video to complete uploading, as indicated by the progress bar below the rectangular area.

Add files to FYP 2020-21 Presentation [assignments]

Stop

5. Once completed, you will be greeted with the following notification:

✓ Upload complete. You can close this window now.

6. After closing the "Add files to assignment" dialogue box, you should see the following:

FYP 2020-21 Presentation [assignments]

Refresh

Filter by date

Sort by: Name Duration Date ▼ Rating

7. Your submission to Panopto is complete.

Late Submissions

The standard university penalty **does not apply here**. Because of significant time pressures, we must complete the Questions and Answer session on time. Therefore, late submissions of the **demonstration video recording** will be subject to a 5% **per hour** deduction.

Guidance

An essential component of the project is to present your work and discuss it in a professional manner. The duration of a demonstration/presentation is fixed at 10-minutes. Depending on the nature of the project (e.g, research or software), an appropriate combination of presentation/demonstration would be required. Please take advice from your supervisor on this.

The demonstration video can be a screen-capture (your screen) or video-recording (of you), or some combination of the two. The demonstration/presentation gives the markers of your project the chance to gather further information on the quality of your work (e.g., research, software product), as well as to observe how well you can demonstrate/present it. Considering the limited demonstration time, you should prepare carefully and do a mock-up demonstration/presentation before the date, perhaps with your supervisor or friends. You may need to be selective on what you are going to demonstrate/present, however, make sure that you cover the key objectives and outcomes of your project as well as your contributions and originality (if there is any) of your work. You need to make appropriate prior arrangements for the demonstration/presentation. As general guidance for the demonstration/presentation,

- Introduce yourself
- Be enthusiastic about your work
- Speak clearly making eye contact with the audience
- Use visual aids as appropriate (images, videos, PPTs)
- Be ready to explain the limitations of your work, difficulties that you encountered and what further work could be done.

In addition to being assessed on the qualities of your project, markers will also judge the quality of your recording; as such, remember to:

- prepare the narrative for the demo video before the recording

- you can edit pieces of narrative to produce the final demo video
- have your ID on the first video frame and state the title of your project.
- speak clearly
- use audio-visual aids as appropriate illustrating crucial features of your work.

Video Recording Marking Criteria

The video recording is marked by the supervisor [10%] and project panel member based on two main criteria:

- **Quality of work** - quality of software, degree of originality and individual contribution), and
- **Quality of presentation and communication** - time management, quality of content, degree of clarity, quality of structure and style, ability to make the demo interesting, ability to respond to questions and discuss.

The supervisor will provide an agreed written feedback justifying the given mark.

Academic Conduct

All work submitted as part of your demonstration must be your own. The following guidelines apply:

Generative AI: Everything in your video recording must be your own work and in your own voice. Using generative AI tools to produce any written, visual or audio content in your demonstration recording is academic misconduct and will be treated accordingly.

Attribution and Third-Party Content:

- Any images, diagrams, or icons used in your slides or visuals must be properly attributed.
- Any work shown (e.g. code) must be your own, or clearly attributed if drawn from open-source or third-party sources.
- Do not use copyrighted music or audio - use royalty-free alternatives or no audio at all.
- If your demonstration features third-party libraries, datasets, or tools prominently, acknowledge them and include a reference list at the end.

In general, do not present someone else's work as your own. Use appropriate attribution throughout. If you are unsure about what is or isn't acceptable, consult your supervisor or review the University's [Academic Misconduct Policy](#).

Questions and Answers Session

You are required to "defend" your project, through the form of a question and answer session. This will be conducted, in-person. Your supervisor and two other markers will be present during the session. You can assume that your markers have watched your demonstration recording prior to the session beginning.

There is no preparation, as such, to do for the Question and Answers session, beyond having a good understanding of your own FYP. You may ask to perform a practice with your supervisor before the session itself.

Getting Help

As always you may use the following mechanism to get help:

- Your Supervisor
- Moodle Q&A Forum
- Microsoft Teams

Remote-Learning Students

If you are currently overseas or not on campus, then arrangements need to be made to organise that you complete your Question and Answer session via Microsoft Teams. It is important that you contact the module convener (Matthew Pike - matthew.pike@nottingham.edu.cn), as-soon-as-possible.

Extenuating Circumstances

If you are unable to complete or attend the specified deliverables on time due to a medical or personal/family issue, then you are required to obtain [Extenuating Circumstances](#). This process can be completed entirely online via The Hub: <https://www.nottingham.edu.cn/en/the-hub/home.aspx>
