

2024-25 UG Module Mark Distribution Statement

This form MUST be completed by all Module Conveners when submitting the marksheet for their module and sent to the Exams Officer

Module code: COMP3056	Module Convenor(s): Anthony Bellotti
-----------------------	--------------------------------------

Please summarise the distribution of marks in this module:

1 st %	15.5%
II-1 %	30.9%
II-2 %	40.0%
3 rd %	11.8%
Fail %	0%
Number of students	109
Number of borderline marks	11
Number of non-submissions	2

As guidance, QSC expectations are that around **30%** of students gain a First Class degree and **80%** a good degree (either 1st or II-1).

Please comment on the mark distribution obtained for the module, confirming that it is a fair reflection on student performance. In particular, please report any action taken to alter raw marks for the module and justify any borderline marks.

In cases of high percentage of Firsts (over 50%) or Fails (over 20%), explain how the best students are currently being challenged and propose specific action to be taken to address this for the following year (which will be followed up).

This year there are less students achieving first class results. I believe this is because this cohort of students is less focussed on this subject than previous years and this is evidenced by low attendance, especially in seminars. In future, the importance of seminars will be emphasized.

However, the mark distribution is within acceptable bounds and no students failed. The mark distribution represents a fair reflection of student performance for this year.

Average marks for assessment components:-

Exam Q1: 13.5

Exam Q2: 9.0

Exam total: 44.1 (out of 100)

CW total: 74.4 (out of 100)

Overall total: 59.2

Please note any issues that have been raised about the assessment (for example a mistake in an examination question) and report on what action has been taken.

None

Please comment on how the distribution compares with the previous year's and outline any actions that have been taken to address issues from the previous year.

Weaker performance this year due to lack of focus in this year's cohort. Also, this result represents a reversion to lower results seen in previous years.

	2023-24	2022-23	2021-22
1 st %	57.9%	28.73%	34.51%
II-1 %	29.9%	36.17%	37.17%
II-2 %	12.1%	29.79%	21.24%
3 rd %	0%	5.32%	6.19%
Fail %	0%	0%	0.88%
Number of students	107	94	113
Number of borderline marks	7	7	3
Number of non-submissions	0	0	0

No action taken.

ONCE COMPLETED, PLEASE RETURN THIS FORM TO THE SCHOOL OFFICE.
