

COMP3056 Professional Ethics for Computing

Individual coursework 1: 2025/26

Frequently Asked Questions

1. I'm writing to ask if there are any specific marking rubric file can be provided for the coursework 1?

Good question. To help you with answering coursework 1 questions, here are some marking criteria you can follow:

Marking Components Per Question (20 marks Each)

Understanding of Ethical & Technical Concepts: 4

Analysis and Depth: 4

Scenario Evidence/Examples: 4

Argumentation & Justification: 4

Structure & Clarity: 2

Communication & Technical Language: 2

Summary by marking bands:

16-20 (Excellent): Nuanced arguments, deep analysis, strong reference to scenario, flawless structure, and professional communication.

11-15 (Good): Clear arguments and analysis, scenario-focused, some minor flaws in logic, examples, or presentation.

6-10 (Satisfactory): Basic/repetitive argument, limited scenario use, surface-level analysis, and some communication/structure issues.

0-5 (Needs Improvement): Major misunderstandings, poor analysis, weak argumentation, irrelevant or missing scenario evidence, poor writing.

2. Is it necessary to include a citation and reference list in the CW? If I use the knowledge from the lecture slides, should I also cite this in my report?

There is no requirement to include citations to external material, but if you think it will support your answer you may do so and we will take it into account when we mark. If you do cite, yes, please provide a reference list.

You do not need to cite lecture material. You can just discuss the concepts you have learned in lectures in your answer.
