

Professional Ethics in Computing – Seminar 5

Coursework 2

Disabilities and Computer Gaming

In today's seminar you will work on a computer/software design to assist individuals with disabilities to play games. Work in your teams to complete these tasks.

Overall, you will have 70 minutes to research and prepare a poster during this seminar. Then you will have 5 minutes to present in *next week's* seminar.

This will be your contribution to Coursework 2 (15% assessment).

Instructions

The times shown are a guideline on how to organize your time, but you can use your time as you and your team feels best.

(1) Work in your teams to research disabilities and accessibility in computer gaming. (10 minutes)

(2) Choose a disability that you would like to consider:

- Vision impairment (partial or full impairment)
- Upper limb disability (arm/hand/finger movement difficulty)
- Hearing disability (partial or full impairment)
- Attention-deficit-hyperactivity-disorder (ADHD)

If you want to consider any other disability, then speak to the convenor.

(10 minutes)

(3) Research the specific disability on the internet and determine what special difficulties this disability group could have when playing computer games.

(15 minutes)

(4) Pick a game, or game genre, that the disabled person may want to play, and articulate a particular difficulty, or set of difficulties, related to the game. Brainstorm computer/software design solutions to address these difficulties to help or enable a person with the disability to enjoy gaming. (25 minutes)

- (5) Prepare a poster with your solution as a Powerpoint slide and submit to Moodle. (10 minutes + *homework after seminar*)

Use file named "Team<n>_disability.pptx".

Only one team member needs to submit the team's file please.

Submission must be made before 17 November 2025 at 16:00.

Note that all the work is intended to be completed during the seminar, but extra time is made available for small refinements and also to equalize time available between the two seminar groups.

Late policy: There is a 10% deduction for each day late.

Then, in the following week's seminar (14 November 2024):

- (6) Presentation of each team's solution: 5 minutes per team.

For the presentation, you must use the poster you produced and plan to submit. You are not allowed to modify it.

Marking

Your team will be marked using the following criteria:

<i>Criteria</i>	<i>Marks</i>
Poster design	20
Presentation skill	20
Finishing presentation on time	10
Motivation and background	10
Description of technical solution	20
Creativity and initiative in proposed solution	20
TOTAL	100

Important:

Only students who attend both seminars and contribute to poster development are eligible for full marks. Students who miss either seminar, without authorized absence, risk losing all marks.
